### **DIMENSIONAL CROSSOVER**

Nature is relentless and unchangeable, and it is indifferent as to whether its hidden reasons and actions are understandable to man or not.

Galileo Galilei

As human beings, our greatness lays not so much in being able to remake the world, as in being able to remake ourselves.

Gandhi

## **Our Psychic Ascent:**

All of us have some degree of psychic ability. In our technical society, these abilities are buried at an early age; people don't discuss these things. To talk about psychic abilities is to invite ridicule, so use and development is discouraged, and the abilities remain dormant. Persons like myself don't find that the gift comes easily and have to work hard at getting results. Nevertheless, we are all born with some psychic ability; it's the "spiritual" side of us if we choose that definition.

It came as a considerable surprise for me to discover that many of the Alien capabilities observed by us are also common to us. Some individuals have performed some pretty far out stuff by everyday standards whether by accident or intent. We have been witness to our own supposedly impossible paranormal events, most often clumsy and uncontrolled. To some, these events are "miracles"; to others they are the work of the Devil.

We have to realize, of course, that in a lot of fields we're beginners; the Aliens are far more advanced in exploiting the properties of the astral than we are. Therein lays our safety. As highly developed spiritual entities, they cannot have evil intent toward us. Unconditional love begins at Dr. Hawkins calibrated consciousness level of 550. At the Alien levels far above human limits, they have the power and intent of Angels. Time and again they have given abductees great gifts of healing, knowledge and elevated consciousness.

As we develop our consciousness and spiritual abilities, the intensity of our "light" becomes brighter, we are on the path to becoming more "Godly," we have greater acceptance of ourselves and become more loving, kind and altruistic to one's fellow Man. With each incarnation we have the opportunity to become more "enlightened" on the way to cosmic consciousness or one-ness with the universal consciousness (God if we like). Mystics tell us that as we acquire powerful psychic abilities, they are to be used only for Man's benefit. Some esoteric,

## *UFOs*

spiritual societies emphasize this point very strongly in their teaching of some very powerful stuff. They say to use your ability for good and noble purposes, or you will suffer negative karma, or indeed, your abilities may be taken away from you by beings called “The Masters.”

Whether or not there is a cosmic police force checking on all the deeds of psychically capable persons is an open question. There are persons capable of “Black Magic” and poltergeists that can do nasty things. Perhaps these people get their comeuppance with bad karma in the next incarnation.

According to most religions, we are the highest creation of intelligence in the universe. Until the Aliens came along, who was to argue; not only did it suit our egotistical view of ourselves, but there were no challengers. Religions still do not accept that scaly reptilian and insect-like creatures could possibly be smarter than us. To suggest that highly developed spiritual minds are powerful enough to create UFOs, travel the universes instantly and have a fantastic spiritual technology that completely overpowers ours, gets the righteous to thinking that you may be allied with the Devil. You are thinking evil thoughts.

We have just begun our psychic development. Our brains will continue to enlarge over time both to exploit our material abilities and the multi-dimensional universe that only a few of us see and awkwardly enter at the present time.

### **Man’s Power to Create “Miracles”:**

In seeking to understand the Alien capability, we will look at humans that, knowingly or unknowingly, have demonstrated that they have many of the same powers as our Alien visitors. It is the very magic demanded from Aliens by Arthur C. Clark as proof of their existence. Carl Sagan, in reference to Aliens, said that extraordinary claims require extraordinary proof. We shall see that Sai Baba, Uri Geller and others are demonstrating the

### *ALIEN THOUGHT MACHINES*

magic and “miracles” that we have been witnessing from the Aliens for so many years. We have the extraordinary proof.

A dictionary definition of a miracle is simply “a supernatural event.” Supernatural is then defined “as being beyond the powers or laws of nature.” We can add to that definition by saying that certain physical, visual or mental events occur which defy the laws of nature (of our universe) and are, therefore, also deemed “miracles.”

Sai Baba (whom we shall learn more about) and men like Jesus are credited with creating many “miracles.” What Jesus did, and what Sai Baba does, aren’t miracles at all, but are simply events made possible by the laws of the psychic universe. Man has a psychic side, and it just so happens that these laws by which “miracles” are created can be learned and developed by people willing to make the effort.

Esoteric spiritual societies like the Rosicrucians have been teaching psychic knowledge that has been known to Man for thousands of years. Today, esoteric teachings are available from: The Theosophical Society, The Monroe Institute, The Gnostic Society, Rosicrucians and others. Ordinary people can learn how to create so-called miracles by utilizing esoteric power from “The Other Side.”

Sai Baba, Jesus, Lord Krishna, Buddha and other mystics are the tip of the iceberg. They are the personification of thousands of other humans with powerful psychic abilities who can also create the impossible.

With much of the life of Jesus and his deeds written about after his death, and because he became the prophet for the Christian religion, Jesus naturally had to be capable of performing miracles. Also, because he was the prophet for a great religion, he had to be bigger than ordinary mortals and had to be nothing less than the son of God. With such a gigantic stature in the minds of men, it’s easy to imagine that the many stories told about Jesus would tend to get exaggerated. Unless one is a believer and accepts the Christ story on faith, a natural skepticism arises as to the truth of all the stories. It becomes

## *UFOs*

difficult to know what is truth and what is fiction. Of course the Bible claims that all the miracles performed by Jesus are, in fact, real, because the men writing of these deeds have been inspired by God and cannot report anything that isn't the word of God...hence the truth.

Jesus was claimed to have performed many cures on the sick, maimed and insane, and to have walked (levitated) over water, made himself invisible, multiplied food, turned water into wine and raised the "dead." He also, after "death," translocated himself out of the tomb and finally raised his physical remains away from Earth to another plane of existence. These are the stories about Jesus coming to us as many times masticated hearsay despite all the claims that these stories are divine truth.

Thousands of people have now witnessed a modern-day "Jesus," Sai Baba, a man with the same abilities. There now exists an unprecedented opportunity for the Christian faith to have real life, real time proof of the abilities of Jesus. Church leaders can come and see the works of Sai Baba for themselves; they can verify the "miracles" of Jesus. Yes, Jesus really did these things; we can see for ourselves.

But that could very well be self defeating for the faith. When mystics say that they are only working with natural unseen forces and not performing any miracles, it could destroy the faith that only God gives his chosen ones the power to create "miracles"... that God has suspended natural law to allow these things to happen. Best to leave the proof alone, and besides, faith in the unknown is a far more powerful, controlling tool of the church than witnessing real, explainable, Jesus non-miracles.

### **Madame Blavatsky:**

Before examining the "miracles" of Sai Baba in detail, another very controversial modern day person who possessed the ability to create what are commonly called "miracles" should be

### *ALIEN THOUGHT MACHINES*

mentioned. It was Madame H.P. Blavatsky. She was able to produce items from “out of nowhere” such as fruit, crockery, jewelry, books, cutlery and many other physical objects. With the same ability she could convert one material object into another, and she could astral travel and make herself invisible. Many books have been written about Madame H.P. Blavatsky describing her both as a charlatan and a saint while also providing ample evidence of her abilities. She has also written “*Isis Unveiled*” and “*The Secret Doctrine*” describing her philosophy. She and Henry Steel Olcott founded the Theosophical Society which remains in existence today.

### **Sai Baba, the Universal Prophet:**

Sai Baba was born in Puttaparti, a village in southern India, on November 23, 1926. Sai Baba now lives in Whitefield on the outskirts of Bangalore, or he spends time at the ashram at Puttaparti, which is a small village about four hours drive north of Bangalore India.

An ashram may be described as a place of ultimate peace, a place of rest with no worldly cares, a haven. He spends most of his time there surrounded by devotees; Sai Baba’s all encompassing love and his omnipresence and message are so powerful to many that they worship him as their Lord, and many choose to remain and live in his presence. Sai Baba is history in the making; he claims he is the prophet for all religions teaching only love for all Man. Sai Baba also claims that he is the returned Christ.

People from all over the world from many different religions come to see and listen to him, and hopefully get an audience with him. With the ability to see into the future, it was only natural that someone would ask the question, how long will you live? Sai Baba indicated that he would live to the age of ninety-four, which would place his transition (death in physical terms) in the year 2020.

## *UFOs*

Because Sai Baba currently performs the full spectrum of “miracles” that are common practice with the Aliens we will examine each one of his abilities in the psychic realm. Sai Baba’s “miracles” have been witnessed by thousands of persons with the veracity of these events residing in the reliability and credibility of the witnesses. Numerous books have been written about Sai Baba, and he has been examined and questioned by thousands of persons including diehard skeptics. He has been photographed and filmed on numerous occasions. All have come away incredulous about what they saw.

It is now possible to grasp the nature of the astral realm and the seemingly God-like capabilities of the Aliens by examining the paranormal abilities of Sai Baba. Sai Baba is living proof of a higher reality. To the Hindu religion, he is an avatar, that is, someone who is an incarnation of God in the human form or a human that contains the ultimate spirit of God. An avatar is believed to be divine at birth, to possess full awareness and special powers, and, at his own volition, has chosen to descend to Earth for the betterment of mankind.

Sai Baba, among many powers, has the power to materialize objects at will seemingly out of nothing, perform instant healing, transform a person’s life, be omnipresent, disappear, instantly translocate himself to any location, read personalities and minds in an instant, teleport material objects anywhere, transform himself into any shape or form (including non-human), communicate telepathically, see the future, and change the nature or composition of any substance.

To millions of persons, there is sufficient consensus (and photographic evidence) to accept that Sai Baba does create his physical creations with an “out of nothing miracle.” To the esoterically ignorant, they are “miracles”; to others familiar with the psychic universe, he utilizes a universal power.

In examining the power and the motivations of Sai Baba, there doesn’t appear to be any ulterior motive to his mission. Sai Baba is not creating a cult or religious movement around himself so there is no purpose in deceit. He accepts nothing in

## *ALIEN THOUGHT MACHINES*

the way of money and states that his message of love is for all of Man and not for one particular religion. Sai Baba is an enlightened avatar; in this state he has no need of further incarnations as a human. But he has stated that he came to Earth voluntarily to bring the message of love to all of Man in this hour of crisis. Sai Baba's maxims are pure enlightenment. We would all do well to live by them. But wouldn't we all do equally well if we heeded the teachings of Jesus regarding love and our behavior to our fellow Man? He teaches only love and states that his mission on Earth is to foster love among all mankind and to uplift the spiritual consciousness of Man.

He performs so called "miracles" because as he has said, it's the only way to get someone's attention if you have a message to deliver. It is his instant and inexhaustible ability to do these things that is of interest in examining the behavior of UFOs and the Aliens. Specific reference will be made to Sai Baba's ability to create material objects "out of thin air" (i.e. thought creations, change the composition of matter, heal people and his ability to instantly translocate himself or other objects).

### **Documenting the "Miracles":**

There are so many thousands of "miracles" performed by Sai Baba that there isn't space to detail them all here. Nor is it really necessary; we only need to look at the areas specific to Alien behavior. There is eyewitness and photographic evidence that these psychic "miracles" do occur.

We can choose to believe or disbelieve whatever has been written about Jesus, Krishna or Buddha. These are stories that were, first of all, told and re-told over the passage of many years before they were documented in writing, and time warps the best of memories. Stories are embellished and change with each re-telling.

The stories of the miracles of Jesus are true to the devout believer, to one willing to accept the Gospel in the faith that

## *UFOs*

these deeds were documented by men who were infallibly inspired by God. Such men cannot be wrong. Jesus and Krishna are prophets of the past and there is no way to prove or disprove their claimed abilities.

The truth of Sai Baba, however, is there for all to see. Not only are there countless witnesses to his “miracles” but there is ample opportunity for the scientific community to capture Sai Baba’s materializations with every modern photographic and investigative technique. Infrared, ultraviolet, gamma, thermal imaging and other penetrating means of seeing in, and around, Sai Baba could be used to determine if he is committing fraud. It would hardly be expected for the major religions to accept Sai Baba as their new prophet regardless of his teaching of universal love; religions just aren’t built that way. Each one must have its own prophet. What Sai Baba does with daily regularity is present science with an unequalled opportunity to witness and record humanly created, “miraculous” events. But the nature of the universal consciousness and the reality of the other planes of existence are just as scary and untouchable for science as they are to religion, so proof of the existence of these realms lies with those that are more open-minded to all of creation.

### **The Paranormal “Miracle”:**

To science there are no “miracles” unexplained phenomena are just that ... unexplained at the moment. Science claims that as it advances in a multitude of fields, the extraordinary and the supposedly paranormal will one day be “ordinary” mainstream science; all paranormal events today will be commonplace science tomorrow. On the other hand, according to religion and the Christian faith, miracles are possible as a result of “the suspension of the effect of a law of nature by God as its author.” To the mystic, there are no “miracles,” only events and phenomena made possible by the laws of the astral realm.

Madame H. P. Blavatsky:

*ALIEN THOUGHT MACHINES*

“A miracle is not a violation of the laws of nature, as is believed by ignorant people. Magic is but a science, a profound knowledge of the occult forces in nature and of the laws governing the visible or the invisible worlds.”

Sai Baba regarding “miracles”:

“They belong to the natural unlimited power of God and are in no sense the product of siddhic powers as with yogis, or of magic as with magicians. The creative power is in no way contrived or developed, but is natural only. Certain other objects were brought from where they were. There are no invisible beings helping Swami to bring things. His sankalpa, his divine will, brings the object in a moment. He is everywhere.”

Sai Baba said that his ability to create whatever he wants comes from his superconscious mind; he only has to imagine the things he wants to create and they are there for him. In Sai Baba’s words: “It’s so simple to imagine this.” There is some quirk of the brain or astral within Sai Baba, and other gifted individuals, that allows them to easily make use of the paranormal realm...abilities that take Tibetan Monks and other spiritually devoted people a lifetime to learn.
