TABLE OF CONTENTS

INTRODUCTION	III
DEDICATION	V
PART ONE - WHERE ARE WE TODAY	1
CHAPTER ONE - HUMAN (HOMO SAPIEN) DISPERSAL WORLDWIDE.....	3
CHAPTER TWO - WORLDWIDE STATUS OF US HUMANS TODAY	19
CHAPTER THREE - RELATIONSHIP GOD SHARES WITH US HUMANS.....	31
CHAPTER FOUR - RELYING ON GOD’S GUIDANCE	43
PART TWO - WHERE ARE WE GOING.....	47
CHAPTER FIVE - EFFORTS BY HUMANS TO CONTINUE PROGRESS.....	49
CHAPTER SIX - REALITY FOR THE FUTURE OF HUMANS	55
PART THREE - WHAT DO WE IN THE FUTURE	61
CHAPTER SEVEN - WHAT IS OUR DESTINY IN THE FUTURE	63

CHAPTER SEVEN

WHAT IS OUR DESTINY IN THE FUTURE

Faced with these seemingly insolvable problems discussed in Chapter Six, how do we Humans proceed? On the one hand, our World Human Population is growing at a rate that is overwhelming the World's ability to provide. Current Population is Three Times the Sustainable Level. Our Human profligate consumption is a part of this problem.

On the other hand, we Humans, having solved 'all' problems regarding our existence, seem left with no goals to achieve, and with no future.

There may be no viable solution for these problems, and we Humans might eventually disappear from Earth. If all 7+ billion of us World Humans were to enjoy a European standard of living, which is about 60% the consumption of the average American, the Earth could sustainably support only about 2 billion people.

The biggest problem is the need to unite us seven billion Humans in this effort to save our civilization. This is important for several reasons. The first reason is to get God's attention, to make it apparent that we Humans recognize the gravity of the problem, and

that we are determined to succeed, with God's guidance. A second reason is to unite us Humans so that we may henceforth produce our best effort in solving these problems; that we may live and work together peaceably worldwide and cease all conflict amongst ourselves; and that we will unite in seeking the best for all Humans – in total, a big order.

Unfortunately, it is not possible to unite our World Population of over seven billion people, to get them to work together in solving these problems. To sum up this insolvable situation, we Humans are faced with these problems:

1. Continued population growth of our overpopulated Earth.
2. Continued conflict between Nations, between Social Groups, between individuals, etc.
3. No effort made to bring together the seven billion plus members of our Humans Family.
4. Exhaustion of all remaining new ideas, improvements, changes, etc. - and now left with nothing new in sight.

The problems demand that the World's best intellects gather together, and develop the strategy needed to overcome these problems (if possible). As we consider the current state of our World Human population, we are an imperfect people – striving to

be better. Let us hope that a 'saving strategy' can be achieved.

In developing this 'saving strategy', a review of our situation is necessary. Our situation involves numerous features:

1. Our Human Population has been in existence for over 300,000 years, beginning as a small group in Africa.
2. Our Human Population has grown to over seven billion persons today, living worldwide on Earth. As such, we (all of us worldwide) are related together as direct relatives or as cousins.
3. We Humans have advanced as different groups throughout the world, subject to varying degrees of exposure and development. As a result, we Humans speak many different languages.
4. We Humans are of many different cultures, have different levels of ability, and vary in physical appearance – including skin colors being white, red, black, yellow, brown, etc. Although many people are similar (one to another), no two are exactly alike (including so-called identical twins).

5. We Humans have countless different Beliefs in God, Beliefs held by the many different groups/Nationalities throughout the World. Surely, God's love and concern is equal for each and every group concerned. And each group's worship is somewhat different, one from another, but surely equal in God's sight. Thus, knowing that differences in our belief are not important, our efforts can be concentrated where important – and not in belittling the belief of others.
6. Question: where is Heaven? In the Christian Belief (similar to other Beliefs) at death, Believers are united with Christ in Heaven - as written in the Holy Bible, John 14:2, Christ stated, "In my Father's house are many mansions: if it were not so, I would have told you. I go to prepare a place for you." With the thousands of Human dead (restored to live with God), a question has existed as to where God's 'mansions' for the restored dead were located. With the Universe's ordinary matter (including planets) being only 4.5%, surely there is plenty of room for them in the 22.7% dark matter of the Universe.
7. Next question: what is the activity enjoyed by our ancestors in Heaven. The only logical

answer to this, is that our ancestors are involved with God in God's management of the Universe.

How does this review of our situation, aid in our development of the 'saving strategy'? It helps us better visualize God's input.

The problem that we face in the development of a 'saving strategy' is, with the problems involved, we have no easy solutions to propose. What is needed, is for the best minds Worldwide, to work together in the formulation of the 'saving strategy'. The selection of those chosen for this task is critical. If the selection is left to us Humans, it is doubtful that we will make the correct selections. Hopefully we can rely on God to make the correct selections, by accepting those as they volunteer for the task.

Having reviewed much of the problem relating to the Destiny of us Humans, a final summation is in order.

#

DESTINY OF WORLD HUMANS

We World Humans do not have the ability to predict our Destiny, nor are we able to plan our actions relating to our Destiny.

We World Humans have reached several critical points in the further progress of our world growth. On the one hand, our 7+ billion World population is both exceeding the size population that our World can support; plus doubling in size every fifty years.

On the other hand, our goal of World progress and advancement has been mostly fulfilled, with little remaining to challenge us. This will require change from vibrant goals to mundane goals of maintenance.

It is not deemed possible for our Human population to adapt/adjust and meet the demands of these changes - a World population of two billion people, and mundane goals of maintenance. What are the alternates for us Humans to consider?

One alternate would be to simply do our best; over the years, eventually reduce our population to a steady level of about two billion people; and seek goals to challenge our citizens. This might take 500 years or more to accomplish – and end with the collapse of us Humans before completion. This solution is not very attractive.

A second alternate (and perhaps only alternate) is for us Humans to look to the Lord God for direction. It is difficult for us Humans to look ahead and in doing so, see only our eventual demise. At the same time, it

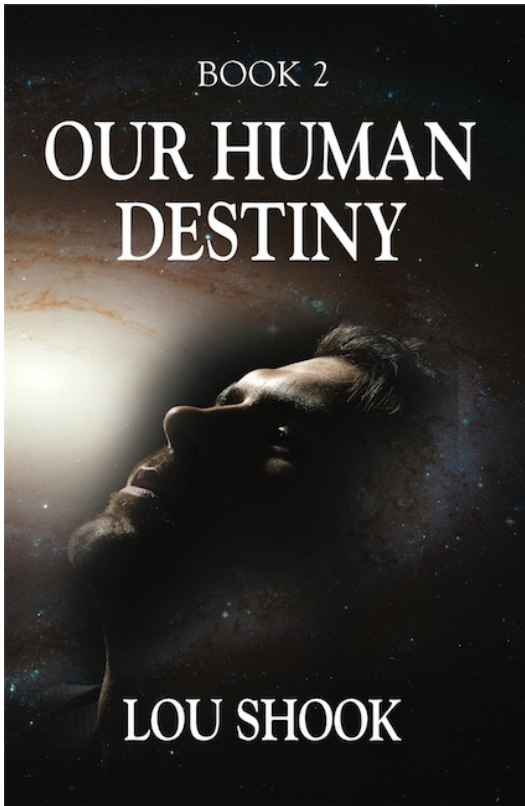

is difficult to believe that God does not have a plan for the perpetuation of us Humans on Earth.

Having given careful consideration to all known aspects concerning the future of us Humans, our only valid choice is to follow the guidance of the Lord God. Our best understanding of God's Guidance includes the following:

1. Remain alert to receive God's Guidance whenever.
2. Live our lives in accordance with God's Guidance.
3. Recognize God's love for all; that we seven billion plus Humans are all related together as family, and we should work together world-wide for the good of all.

It is of maximum importance, that we Humans concentrate together Worldwide, in our best efforts to develop this Plan for our Humans Future, and for the successful implementation of this Plan. We have a tremendous responsibility to carry our civilization forward – regardless whether other equal civilizations exist or not. Our failure could result in a catastrophic impact to the future of our Universe. We cannot afford to postpone our corrective action – we must proceed now!

LET US UNITE IN PAYING HEED TO THIS PROBLEM
AFFECTING OUR FUTURE!

At the rate that Human population is growing, our World will no longer be able to support our Human population. The biggest problem is uniting us seven billion Humans to resolve our demise. We must devise a 'Saving Strategy', or perish. Let us unite in paying heed to this problem.
